Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-5, the allowability in combination with the other claimed is because nowhere in the prior art is there an activated carbon having a hard-to-graphite material with water vapor that a median particle size ranging a range from 4 μ m to 8 μ m in a particle size distribution when measured by laser diffraction method. Regarding claims 6-7, the allowability in combination with the other claimed is because nowhere in the prior art is there an activated carbon having a hard-to-graphite with water vapor, wherein the activated carbon particles comprises not less than 10% by weight of particles not larger than 2 μ m in a cumulative distribution and particles. Regarding claims 8-10, the allowability in combination with the other claimed features is because nowhere in the prior art is there a polarizing electrode having activated carbon contains 10% or more in accumulated percentages of particles having sizes not larger than 2 μ m and has a bulk density within a range from 0.18 g/cm³ to 0.25 g/cm³.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Citation of Pertinent Prior Art

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
